Purple Pharma | Laravel, MySQL

Apr 2024 - Jul 2024

- Developed a comprehensive dashboard for managing doctors, chemists, products, gifts, and users with specific roles and permissions (BO, SBO, ABM, RBM, ZSM, NSM, GM, VP, President, Director, Admin).
- Enabled BOs and SBOs (Medical Representatives) to file Daily Call Reports (DCRs), track doctor and chemist visits, manage campaigns, assign products, handle gifting, track personal expenses, and monitor business outcomes.
- Established a clear hierarchy and approval process between roles, ensuring structured workflow and accountability.
- Implemented a mapping feature for reassigning doctors, chemists, and subordinates when users leave the organization.
- Designed an approval matrix across modules where necessary streamline operations and ensure compliance.
- Enhanced data security by implementing role-based access control, ensuring that users only have access to relevant information and features.

Tap2Crack Chat App | ExpressJs, NodeJs, Websocket, MySQL

Jul 2024 - Present

- Developed a chat application for live class.
- Chat has multiple features like create Rooms, 1-1 chatting also has notifications, kicking users from rooms.
- Handling permissions for moderator and simple student.

Tap2Crack Admin Gateway | Laravel, Redis, Cache, MySQL

Mar 2024 - May 2024

- Tap2crack has many features like. Management of roles, categories, subjects, students, exams, courses, books, coupons, study materials, purchases and many more.
- Developed a Test Series feature that allows users to create sections and add questions with assigned marks.

- Implemented a drag-and-drop feature for easy creation of question sets.
- Created a folder hierarchy in the course section to help users easily locate, upload, and modify files and folders.

Tap2Crack Blog | Laravel, MySQL

Jun 2024 - Jun 2024

- Developed a dashboard enabling users to manage categories, upload prospect images, and write blogs that automatically sync to the Tap2Crack blog site.
- Tap2crack Blogs has 3 screens.
 - * **Homepage:** Displays each category with the six latest articles.
 - * **Category:** Lists all articles associated with a specific category.
 - * **Articals:** Provides detailed reading of Articles, displays related articles, and includes course navigation links.

Short Url Generator | Laravel, MySQL

Aug 2024 - Aug 2024

- A URL shortening service that allows users to create shortened links, making long URLs more manageable and trackable.
- This application is mapped for various devices and products, including desktop and Android devices.
- **The link has three behaviors:** Web Only, App Only, and App then Web Only.
- When the link is triggered by a desktop, it redirects to the full URL.
- When the link is triggered by a mobile device, it attempts to launch the respective app; if the app is not found, it redirects to the Play Store or the full URL in the mobile browser.
- A dashboard is provided for tracking and managing shortened links efficiently.

Partner Portal | OpenCart, MySQL

Mar 2023 - July 2023

- Cloud-based, AI-powered Vendor Management Platform.
- Developed company and vendor product relationships, enabling companies to order products from vendors and vendors to view their product orders.
- Implemented data synchronization between Celigo, Netsuite, and Partner Portal through custom APIs.
- Designed and built dashboards with comprehensive filter options for data analysis.
- Created dynamic HTML input fields for public form, allowing users to customize and reorder fields as needed.
- Integrated GST validation API for compliance.
- Developed API for document uploads to AWS S3.
- Established webhooks to ensure seamless data synchronization between Partner Portal, Netsuite, and Celigo.
- Managed data access restrictions across Super Admin, company, vendor, and five additional user groups.
- Addressed and resolved daily bugs using Jira.
- Utilized MySQL for efficient data storage and retrieval.

ODSAPI | Laravel, MySQL

Mar 2023 - July 2023

- Developed APIs to fetch and store Shopify data (Products, Sales, Orders, Payments) in MongoDB.
- Created APIs for syncing data with Netsuite, tailored for companies and their vendors.

Indent Portal | PHP, MySQL

Nov 2021 - Mar 2023

- Managed product licenses with CRUD, alerts for expiry, and financial threshold-based approval matrix. Migrated to Laravel.

TRF (Termination Request Form) Portal | PHP, MySQL

Nov 2021 - Mar 2023

- Dashboard for contract status tracking. Included 5-level approval workflow with chat for clarifications.

Credit Notes Portal | PHP, MySQL

Nov 2021 - Mar 2023

- Enabled credit note requests with Excel data import and multi-level approval matrix for CSEs.

PayEasy | PHP, MySQL

Nov 2021 - Mar 2023

- Integrated Razorpay/BillDesk for payments, with payment links, barcodes, email notifications, and real-time webhook confirmations.

Lead Tracker | PHP, MySQL

Nov 2021 - Mar 2023

- Managed leads with dashboards, Google Drive integration, report exports (Excel/CSV), and lead scoring API.

Myclaim | PHP, MySQL

Nov 2021 - Mar 2023

- Expense claim portal with document uploads, multi-level approvals, and comment-enabled decision options.

Daily Sales Performance (DSP) | PHP, MySQL

Nov 2021 - Mar 2023

- Built 4 apps (NKA, SSD, HYG, PSD) for field data collection. Integrated Google login and JWT-based authentication.

Indian Oil Analytics | CakePHP, MySQL

Aug 2021 - Oct 2021

- Developed frontend and backend services using CakePHP, with PostgreSQL as the database.
- Implemented reporting features for various time frames (daily, weekly, monthly, etc.).
- Added export functionality for reports into CSV and Excel formats.
- Automated the distribution of daily reports to managers at the area, city, state, and country levels.

Version7.edeveloperz.com | CodeIgniter, MySQL, MongoDB

Aug 2021 - Oct 2021

- Build custom templates daily reports mailing.
- Build PPC reports page with dashboards and custom layouts. With multiple charts and export feature.
- Integrate Woo foo, Google form, Jot form third party API to version7 and version8 dashboard.
- Used Webhooks to monitor events at form submissions.
- Data scraping for generating reports like ratings, reviews of posted business on websites.
- Used Cron jobs to pull data daily from third party data to our database.
- Used CodeIgniter framework for frontend and backend services and MongoDB, MySQL to fetch and store data.

Service.edeveloperz.com | Slim, MySQL, MongoDB

Jun 2019 - Jun 2021

- Developed APIs for Version7 features to facilitate interaction with various front-end platforms and devices.
- Utilized the Slim PHP framework for API development, with Version7 being built in CodeIgniter.

Personal Projects | Slim, MySQL, MongoDB

Jan 2019 - Jan 2022

- **Ad Platform:** Developed a Laravel-based platform for buying and selling ads between clients and customers, with MySQL for data management.
- **Computer Class Management:** Created a system for managing student registration, courses, fees, and certifications using CakePHP and MySQL.
- **MLM System:** Built a user registration and management system with revenue dashboards for each hierarchical user, using Laravel.
- **E-commerce Application:** Developed an online gift business platform (cakes, candies, flowers) using Laravel.
